17	M	5	General Dental Practitioner	General Dental Service

Table 1: Demographics of the dentists interviewed

Resident	Gender	Age	Care home	Location	Size, Type & Funding	Last CQC rating	NHS primary health care involvement (medical and dental)
1	F	91	1	City suburb with low deprivation	24 beds	Good	Visited by General Medical Practitioners from multiple practices and district nurses. General Dental Practitioner provided 6 monthly dental check-ups and the care home provided the dentist with a retainer for this service.
2	F	80			Residential beds only, all privately funded.		
3	F	85			Privately owned		
4	M	79					
5	F	83					
6	M	78	2	Suburban coastal town	48 beds	Good	Visited by General Medical Practitioners from multiple practices and district nurses. Not visited by a General Dental Practitioner and used local Community Dental Service when needed
7	F	89			Nursing and residential beds, mixed funding (private and social services)		
8	F	92			Run by a large care home organisation		
9	F	97					
10	F	83	3	City suburb with high deprivation	58 beds	Good	Visited by a single General Medical Practice that provided weekly clinics and visits from district nurses. Not visited by a General Dental Practitioner and used local Community Dental Service when needed
11	F	78			Nursing and residential beds, mixed funding (private and social services)		
12	M	85			Run by not-for-profit organisation		
13	M	74					

Table 2: Demographics of the residents and the care homes where they lived
